# Our Solution – Self Test Kiosk

Cost Saving kiosk with great benefits for patients and healthcare professionals

- Vital and Viral parameter check
  - Blood pressure – Heartbeat
  - Weight – BMI calculator
  - Oxygen saturation level
  - Optional : Temperature / Length
- Easy to use by patient
- Medical validated questionnaire interface
- Powered by Well Home
- Some examples of use cases : Triage in ER / Assistant to GPs / Hospitals / Retail

Over 1M  
Patient  
Check ups

EMR  
Connectivity

Medical  
Grade

Cost Saving  
1,5 FTE/Annum

Customer

# Our Solution – Well Home

Versatile and flexible **software** solution

## Module I

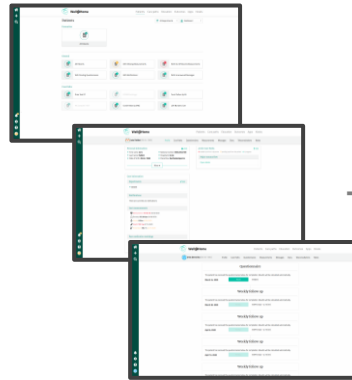

### Patient Self Serve

Administrative & Logistic  
Simplification

## Module II

### Patient Remote Data Collection and Exchange

Data exchange  
between  
Hospital/Care  
Team and Patient

## Module III

### Patient Remote Care and Monitoring

Hospital at Home

**Modular** solution  
Following a  
**digital journey**

Developed from  
**within a hospital**

One **patient app** for all  
today's and future  
applications

**EMR**  
connected

**Easy to Integrate** with  
Pathology specific App/HW  
vendors

**Customer**  
branded

# Our Solution – Well Home

Versatile and flexible **software** solution

## Module I

### Patient Self Serve

**EMR Access** – insight in medical record

**Appointments** – book, access, manage, share pre-appointment information

**Admissions** – access, pre-admission info

**Entry management** – ensure easy access to hospital (eg. QR code)

**Invoices** – receive, view, pay

**Meals** – selection, ordering

**Parking** – payment

## Module II

### Patient Remote Data Collection and Exchange

**Care path builder** – design tool, care path process automation, care path library, easy tool to create custom care paths

**Questionnaires** – template library available & easy questionnaire builder

**Diary** – allows patients to provide daily input on specific variables

**Communication tools** – (multimedia) messaging, notifications, education module

**Video consultations**

## Module III

### Patient Remote Care and Monitoring

**Telemetry** – continuous and/or intermittent monitoring with medical devices (body temperature, pulse or heart rate, blood pressure, oxygen level & saturation) – Integrate with other Pathology specific App vendors

**Clinical Command Centre** – comprehensive dashboard for care team - overview of all patients & care paths, early warning score & priority triage, EMR access with contact info & next steps

# In summary

**Future Proof solution**  
**Modular** approach  
Developed for your  
**digital journey**  
Protection of  
investment

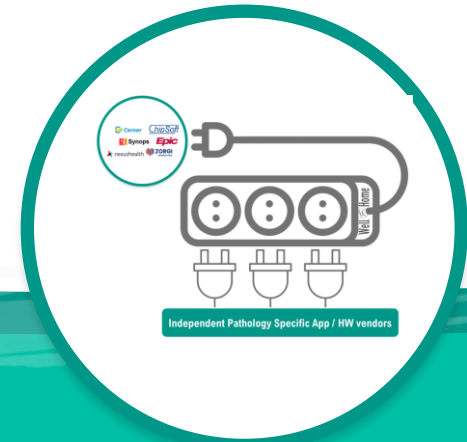

**EMR**  
Connectivity

**Customer Branded**  
White label,  
applications are  
presented as a  
customer app

**Self Test Kiosk**  
Unique offering in  
combination with  
**Well Home**  
SW solution

**An open ecosystem** acting  
as a 'power strip'.  
Easy to integrate  
with pathology  
specific HW/app  
vendors

# Benefits for key-stakeholders

## Benefits

### Hospital Management

- **Reducing costs**
  - Patient Self Serve
- **Optimizing processes**
  - Automation through customized care paths
  - Shorter hospital stays
  - Reduced (re)admission rate

### Care team

- **Better care**
  - Closer to the patient
  - Well@Home supports in the background, nonintrusive with how they work today
- **More efficient**
  - Through automated care paths / Through the tools offered in Module II and III

### Patient

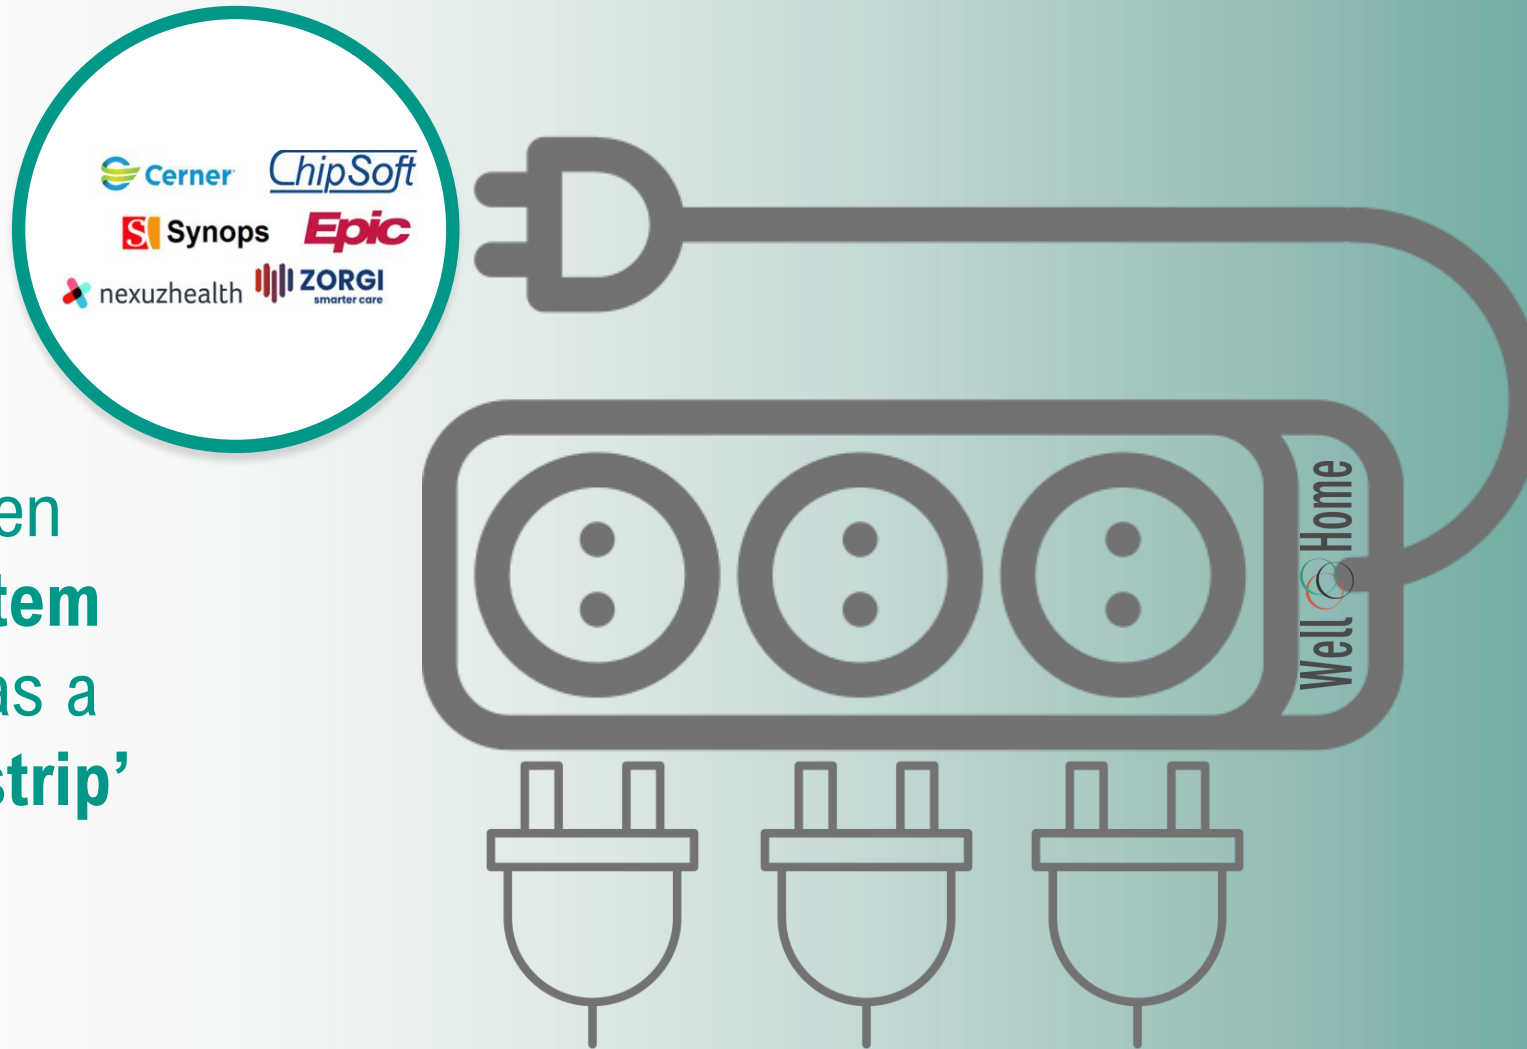

- **Better patient experience**
  - Easy communication with Care team
  - Better informed
- **One application only**
  - Well@Home app as a swiss knife
  - From paying invoices or parking all the way to telemetry, all can be done with the same app / web application

### IT Department

- **Well@Home as middleware**
  - Act as a power strip for other pathology specific hardware / software vendors
  - Plug & Play
  - Only 1 application to connect with EMR
  - Future proof

# Our Solution – Well Home

Versatile and flexible **software** solution

An open  
**ecosystem**  
acting as a  
**'power strip'**

- **Hardware**

- Bloodpressure A&D
- Weight scale A&D
- Activity tracker 2M
- Sleepmonitor Beddit
- SpO2 meter Nonin
- EKG Viatom
- Sleepmonitor Emfit
- Thermometer A&D
- Heartmonitor Biobeat (wip)
- Heartmonitor CardiacSense (wip)

- **Software**

- Umbi
- Mediktor
- Cardiolyse
- Rehub DyCare
- C-Meal Cegeka
- Cerner HealtheLife
- aWell
- Bingli\*
- Remecare\*
